EXPERIENCE

Braintree, Chicago, IL — *Software Engineer*

June 2020 - PRESENT

- Contribute to Spring Boot Pricing application that creates scheduled jobs to retrieve data from banking partners, use data to aggregate into fees, and then send fee information to Braintree's disbursement and reporting platforms.
- Collaborate in an agile, pair programming environment as well as work closely with the Financial Operations team to discover and implement enhancements and fix bugs.

Technologies used: Kotlin(JVM), Java, Spring Boot, Kubernetes, Docker, Postgres, AWS, Apache Spark, Apache Airflow, Jenkins.

Braintree, Chicago, IL — *Technical/API Support*

December 2016 - June 2020

- Created example Braintree integrations and internal support apps, including QA tool to compile and email monthly reviews.
- Debugged and helped troubleshoot merchant code as well as investigate server logs to help resolve merchant integration issues.
- Munge and manipulate data for raw credit card imports/exports by creating custom scripts and utilizing command line tools to create desired data format.

Liberty Mutual Insurance, Warrenville, IL — *Inside Auto Damage Appraiser*

February 2012 - November 2016

- Wrote accurate repair estimates from photos or descriptions for damages to automobiles and negotiated fair prices with body shops.
