EXPERIENCE

Braintree, Chicago, IL — *Software Engineer*

June 2020 - PRESENT

Contribute to building a new Pricing application that creates a series of jobs to retrieve data from banking partners, use data to aggregate into fees based off of specific fields, and then send fees to Braintree's disbursement platform. Collaborate in an agile, pair programming environment as well as work closely with the Financial Operations team to discover and implement enhancements and fix bugs.

Technologies used: Kotlin(JVM), Spring Boot, Kubernetes, Docker, Postgres.

Braintree, Chicago, IL — *Technical/API Support*

December 2016 - June 2020

Assisted merchants with troubleshooting their integrations by reviewing and testing code. Helped build and maintain internal tools, such as Ruby QA application that automates compiling data and sending QA reviews to each support representative.

Liberty Mutual Insurance, Warrenville, IL — *Inside Auto Damage Appraiser*

February 2012 - November 2016

Wrote accurate repair estimates from photos or descriptions for damages to automobiles.
